

## Product Information Sheet

### Rabbit Anti-T7 IgG conjugated to PerCP

Product Number D11-1834  
Amount 100 µg total protein

#### Form/ Storage

Conjugate supplied as a lyophilized powder. Upon receipt, store at 2-8°C in the dark.

#### Handling

Avoid exposure to heat and light. Prior to use reconstitute to 1 ml with distilled deionized water, vortex and allow it to sit on ice for 20 minutes.

#### Buffer

Upon reconstitution, the product is in 100 mM sodium phosphate (pH 7.4), 50 mM sucrose, 150 mM sodium chloride, 0.1% BSA as a stabilizer, and 2 mM sodium azide as a preservative. The concentration of the conjugate is 100 µg/ml.

#### Stability

Lyophilized material is stable for one year. After product has been reconstituted, product should be stored at 2-8°C in the dark and be used within 3 months.

#### Note

For research use only, not for diagnostic or therapeutic use.

#### Spectral Characteristics

Visible absorption maxima 483 nm  
Emission maximum 673 nm

**Concentration** 0.1 mg/mL  
(after reconstitution)
