

Streptavidin conjugated to PerCP

Product Number D11-2212
Amount 1 mg total protein

Form/Shipping

Conjugate supplied as a lyophilized powder. Upon receipt, store at 2-8 C in the dark.

Handling

Avoid exposure to heat and light. Prior to use reconstitute to 1 ml with distilled deionized water, vortex and allow it to sit on ice for 20 minutes.

Buffer

Upon reconstitution, the product is in 100 mM sodium phosphate (pH 7.4), 50 mM sucrose, 150 mM sodium chloride, 0.1% BSA as a stabilizer, and 2 mM sodium azide as a preservative. The concentration of the conjugate is 1 mg/ml.

Note

For research use only, not for diagnostic or therapeutic use

Spectral Characteristics

Visible absorption maxima	483
Emission maximum	673 nm
